The land has been thoroughly reported upon by W. F. Remy, noted geologist and pronounced one of the most favorable locations for the discovery of oil in the entire west. Nick Theo, of Goldfield is the Nevada representative of the Excelsior company, which is well financed to drill as deep as conditions may warrant, in fact that 4,000 feet of casing has been shipped for this company shows things have started on a business basis for Fish Lake Valley.

C. D. Crane, Nevada manager of the West Coast Oil company, which has leased the Kennedy ranch in Fish Lake Valley, leaves for Los Angeles, by auto today, going by way of Coaldale and Fish Lake Valley, to purchase and ship immediately a standard rig for the valley. The Fallon Texas company a co-operative oil company, holding lands in Arkansas, Texas, Utah and Nevada, has entered the Fish Lake field by securing title outright to the oil and gas rights on the Fabb ranch of several hundred acres. A local operating board of this organization has been appointed and work will proceed at an early date, since the management hopes to be able to have delivery made of a rotary outfit for the Fish Lake field in the next sixty days.
Pat Mooney and a party of Tonopah people leave for the valley tomorrow to look over land which they will incorporate on at once. Several other parties are now preparing to enter the Fish Lake field.

Sunday next the chief field engineer of the Fallon Texas company and a party of interested stockholders, both local and from the south, will go to Fish Lake to begin an exhaustive examination of the geology, paleontology and structure of the entire valley.
There no longer remains any doubt about the activity in Fish Lake Valley. Rigs and drilling equipment are being shipped in by the thousands. These things are new facts. Business is in the air and oil people have gone into that promising oil field, which bids to be heard from in the near future in words of actual oil production.
